Clonetics™ Aortic Adventitial Fibroblast Cell Systems
AoAF

Introduction
Clonetics™ Adventitial Fibroblast Cell Systems contain Normal Human Adventitial Fibroblasts (AoAF) and optimized media for their growth. Each System can quickly generate AoAF cultures for the study of disorders of human fibroblasts such as fibrosis, scleroderma, fibrosarcoma, xeroderma pigmentosum and histiocytoma. Clonetics™ Adventitial Fibroblast Cell Systems are convenient and easy to use, allowing the researcher to focus on results. Cryopreserved AoAF are shipped in second passage.

Clonetics™ Cells, Medium and Reagents are quality tested together and guaranteed to give optimum performance as a complete Cell System.

Cell System Components (Need to be purchased separately)
- One Adventitial Fibroblast Cell Product (Cryopreserved)
- One Stromal Cell Medium BulletKit™ - 500 ml
  Clonetics™ SCGM™ BulletKit™ (CC-3205) contains one 500 ml bottle of Stromal Cell Basal Medium and the following growth supplements: hFGF-B, 0.5 ml; Insulin, 0.5 ml; FBS, 25 ml; GA-1000, 0.5 ml.
- One ReagentPack™ (CC-5034) Containing:
  Trypsin/EDTA 100 ml
  Trypsin Neutralizing Solution 100 ml
  HEPES Buffered Saline Solution 100 ml

Characterization of Cells
Routine characterization of AoAF includes immunofluorescent staining. Cells stain negative for smooth muscle α-actin.

Performance
Recommended seeding density for subculture 3,500 cells/cm²
Typical time from subculture to confluent monolayer 6 - 9 days
Additional population doublings guaranteed using Clonetics™ System 10

Quality Control
All cells are performance assayed and test negative for HIV-1, mycoplasma, Hepatitis-B, Hepatitis-C, bacteria, yeast and fungi. Cell viability, morphology and proliferative capacity are measured after recovery from cryopreservation. Clonetics™ Media are formulated for optimal growth of specific types of normal human cells. Certificates of Analysis (COA) for each cell strain are shipped with each order. COA’s for all other products are available upon request.

Ordering Information
Cryopreserved Cells
CC-7014 AoAF ≥500,000 cells

Proliferating Cells – Flasks and Multiwell plates
CC-7014T25 T-25 Flask
CC-7014T75 T-75 Flask
CC-7014W96 96-well Plate

Other proliferating formats are available. Contact Scientific Support or refer to the Lonza website for details.

CC-3205 SCGM™ BulletKit™, SCBM™ plus SingleQuots™ growth supplements 500 ml
CC-3204 SCBM™, Stromal Cell Basal Medium 500 ml
CC-4181 SCGM™ SingleQuots™, Formulates SCBM™ to SCGM™
CC-5034  ReagentPack™
Trypsin/EDTA Solution  100 ml
Trypsin Neutralizing Solution  100 ml
HEPES Buffered Saline  100 ml
Solution

When placing an order or for technical service, please refer to the product numbers and descriptions listed above. For a complete listing of all Clonetics™ Products, refer to the Lonza website or the current Lonza catalog. To obtain a catalog, additional information or technical service you may contact Lonza by web, e-mail, telephone, fax or mail.

Product Warranty
CULTURES HAVE A FINITE LIFESPAN IN VITRO. Lonza guarantees the performance of its cells only if Clonetics™ Media and Reagents are used exclusively, and the recommend protocols are followed. The performance of cells is not guaranteed if any modifications are made to the complete Cell System. Cryopreserved AoAF are assured to be viable and functional when thawed and maintained properly.

THESE PRODUCTS ARE FOR RESEARCH USE ONLY. Not approved for human or veterinary use, for application to humans or animals, or for use in clinical or in vitro procedures.

WARNING: CLONETICS™ AND POIETICS™ PRODUCTS CONTAIN HUMAN SOURCE MATERIAL, TREAT AS POTENTIALLY INFECTIOUS. Each donor is tested and found non-reactive by an FDA approved method for the presence of HIV-1, Hepatitis B Virus and Hepatitis C Virus. Where donor testing is not possible, cell products are tested for the presence of viral nucleic acid from HIV, Hepatitis B Virus, and Hepatitis C Virus. Testing can not offer complete assurance that HIV-1, Hepatitis B Virus, and Hepatitis C Virus are absent. All human sourced products should be handled at the Biological Safety Level 2 to minimize exposure of potentially infectious products, as recommended in the CDC-NIH Manual, Biosafety in Microbiological and Biomedical Laboratories, 5th Edition. If you require further information, please contact your site Safety Officer or Technical Services.
